

Are you fire safe?

Check for the following:

- Has your fire system remained unserviced for more than six months?
- Have your fire extinguishers remained without service for more than 12 months?
- Do you see grease dripping from your kitchen exhaust hood?
- Do you hear any noise from your exhaust fan?
- Do you feel vibrations coming from the roof?
- Does your kitchen area feel warmer than usual?

If you answered yes to any of these questions, your business could be at serious risk.
